

The system for a simple introduction to a complex subject

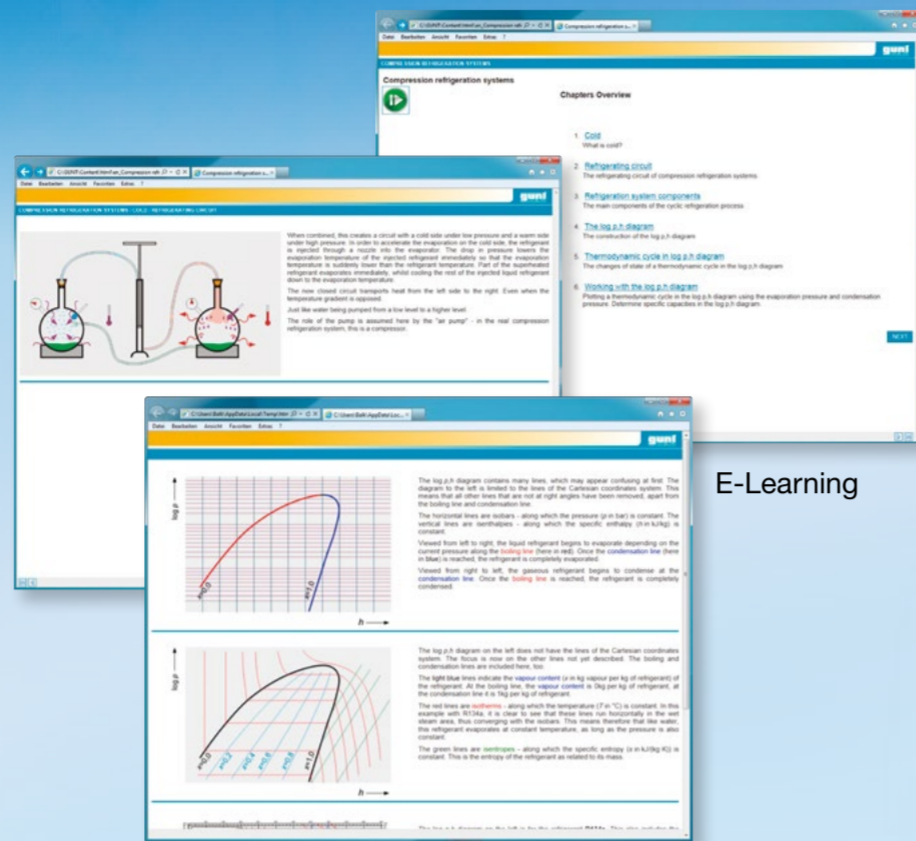

ET 915

HSI Training System for Refrigeration and Air Conditioning Technology

Training Software

An important component in addition to operation and data acquisition

- multimedia course on home PC
- flexibility thanks to learning at your own pace, anywhere and at any time
- increased motivation through originality and playful approach to learning material
- ideal complement to the classroom

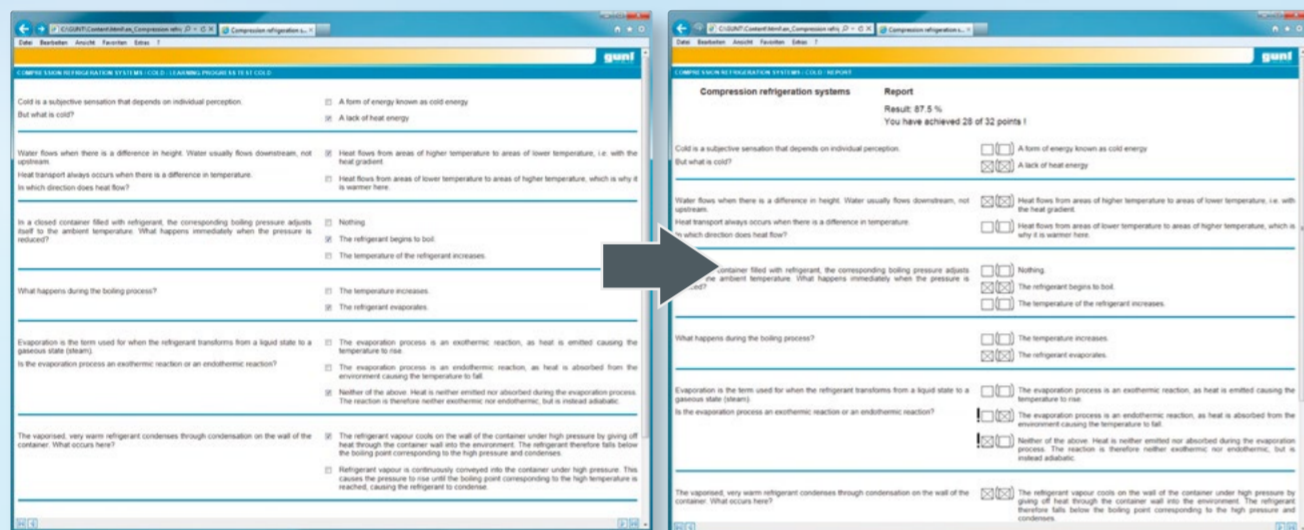

E-Learning

Data Acquisition

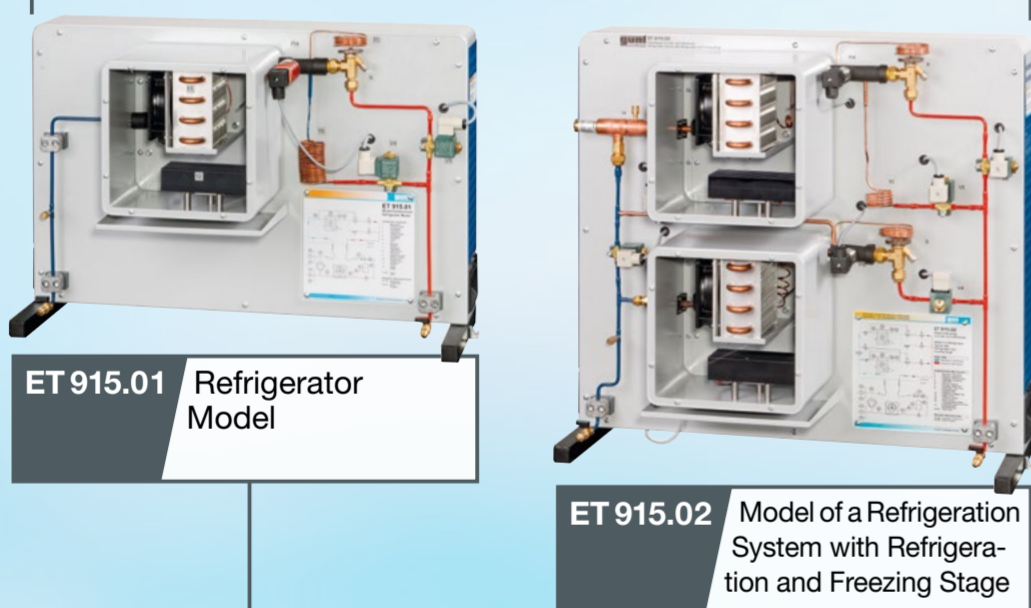

with full network access

- full network access to ongoing experiments by any number of external workstations
- real-time representation of the state of humid air in the Mollier h,x diagram and the refrigeration cycle in the log p-h diagram
- plug & play via USB system

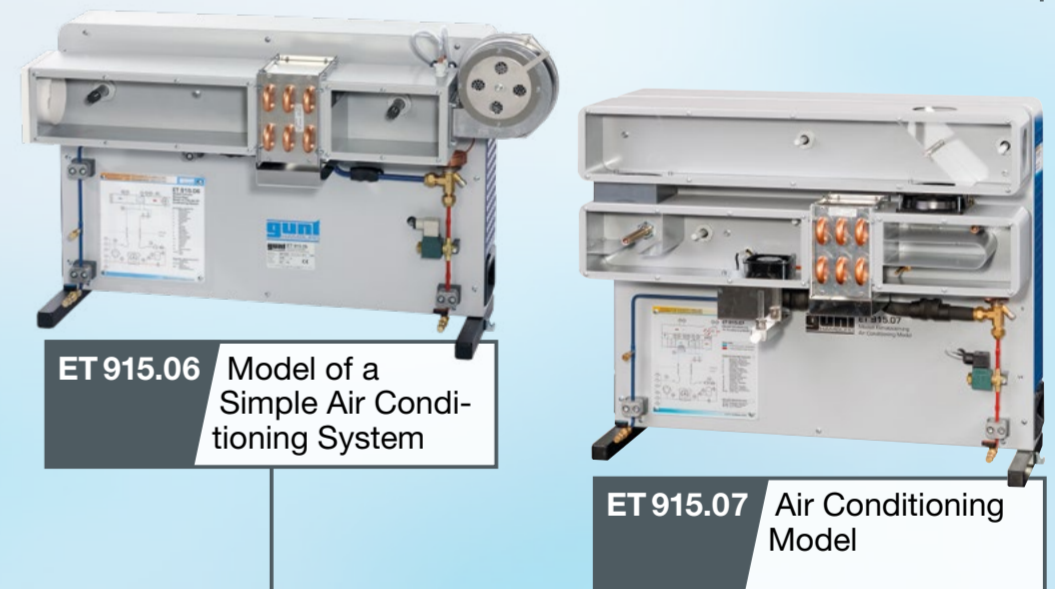

Targeted review of the learning content

Refrigeration

All models include expansion elements and evaporators

Air Conditioning

The ET 915 base unit contains the main compressor and condenser components

Comprehensive modular training system for refrigeration and air conditioning technology
