gunt HAMBURG

Digital structures for technical education

GUNT Media Center
for teaching and training in metal and machine technology

Technology projects

The **hardware** is part of it. We value the integration of real industrial technology and digital methods and materials.

Large selection of technology projects: Gearboxes, shut-off devices, pumps and much more...

Complete set of assembly tools included

Clear storage system with labelling

Education 4.0
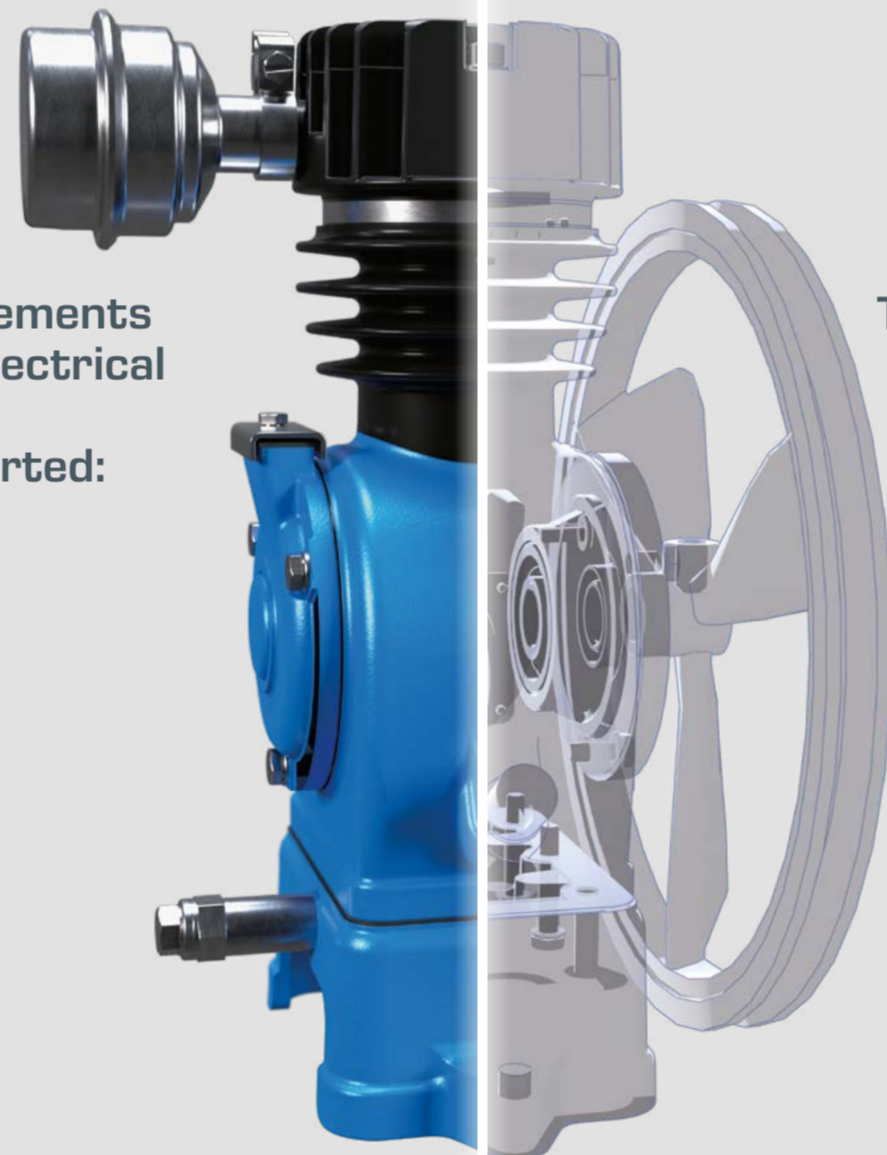

Traditional learning content	+	Digital data package
Classic learning content remains		Digital content and methods are added extensively

The new requirements for metal and electrical professions are perfectly supported: develop digital competences

The GUNT Media Center turns our basic technology projects into digital projects

3D printing or CNC manufacturing

(CAD/CAM) Design data facilitate the introduction to 3D printing and CNC manufacturing technology

ERP system

Data integration into an ERP system possible

GUNT Media Center

The **digital content** of the Media Center: comprehensive and versatile

As a customer, you have unlimited access to the digital content of your project.

- all files directly available via internet browser: smartphone, tablet or PC
- no further software required
- constant updating of the data, available for you as customer, and absolutely free
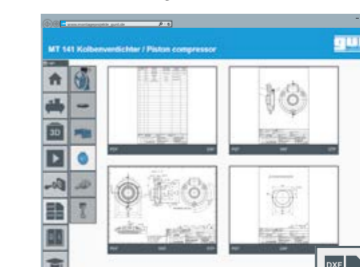

Simply scan the QR code and you are already in the GUNT Media Center.
