

Next generation assembly exercises

Industry 4.0 in technical education:
“Don’t talk, just do it”

All data available
digitally and online

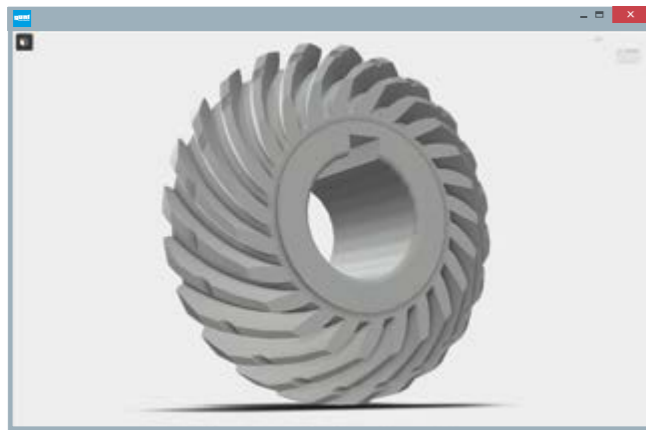

Real hands-on
assembly exercises

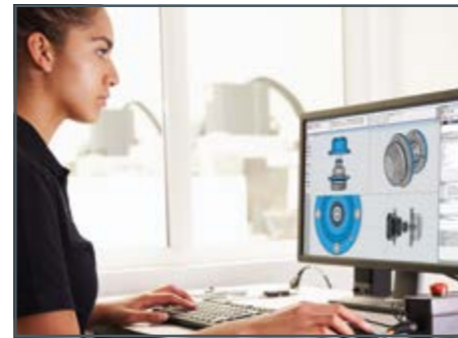

Smart storage
system

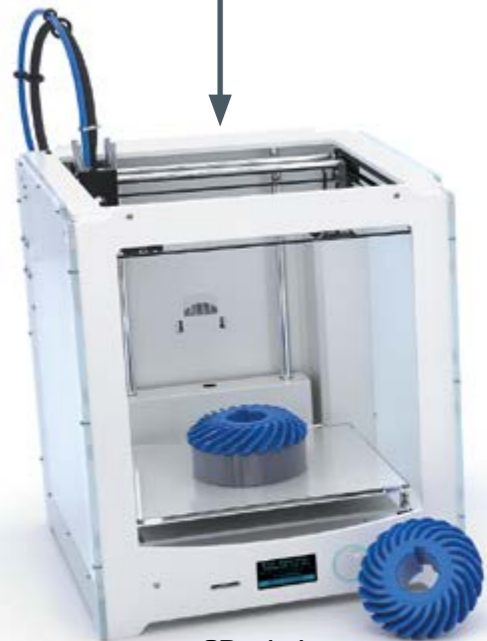

A completely new learning concept results from classical **assembly exercises** combined with **interactive data** and creates access to **industry 4.0 understanding**.

Digital data (CAD)

Design exercises possible

3D printing or CNC manufacturing (CAD/CAM)

Design data facilitate the introduction to 3D printing and CNC manufacturing technology

ERP system

Data integration into an ERP system possible

GUNT Media Center

Hardware

- assembly exercises on an industrial level
- USB stick with files and manuals
- access to the GUNT Media Center

Clear storage system with labelling

Complete set of assembly tools included

Real assembly exercises

GUNT Media Center

- all files directly available via internet browser: smartphone, tablet or PC
- no further software required
- constant updating of the data, available for you as customer, and absolutely free

Just scan the QR code on the box

Didactically sophisticated exercises, a perfect storage system and full access to digital data.
All at an unbeatable price and shortest delivery times.

Learning objectives

- assembly and disassembly of various exercises
- planning of the assembly process
- familiarisation with various machine elements and their function
- reading and understanding of engineering drawings
- familiarisation with materials
- dealing with digital data: CAD files (STP, CAD), 3D PDF, exploded views
- generation of programs for 3D print and CNC machining
- data can be also used for an ERP system

Advantages

- comprehensive technical information and didactic material online, on USB stick and as printed manual
- no surcharge or accessories policy: You will receive everything you need for your successful lessons with one order number
- full access to GUNT Media Center
- at GUNT you speak with experts: we are a mechanical engineering company. This distinguishes us from dealers or publishers. You benefit from it.

3D drawings of all component groups

Assembly and disassembly videos

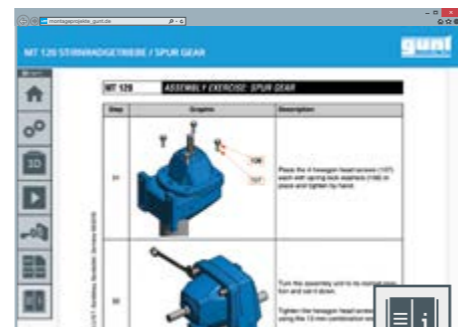

Exploded views

View of component groups

Engineering drawings and lists of parts

Manuals

Overview of the assembly exercises

 Getriebe / Gears	 Armaturen / Valves and fittings	 Verdichter / Compressors	 Pumpen / Pumps
 Kältetechnik / Refrigeration	 Lager / Bearings	 Prüftechnik / Dimensional metrology	... we are constantly working on further assembly exercises Technisches Zeichnen / Engineering drawing
